L	Remarks:
	Local Option
	<p>Initial dispatch was for a single company investigation due to an incomplete 911 call from the Richmond Hill Inn. E-6 responded and while en route nature of call was changed from an investigation to a structure fire due to reports were being received of a working fire at the inn.</p> <p>E-6 arrived to find a heavily involved structure with fire visible as they approached. E-6 then forced entry onto the grounds of the property and relayed a size up of "2 story wood frame fully involved, Code 2" and established IMS with Captain Hendrix initially in command, he then also called for a second alarm due to the size of the structure and amount of fire involvement.</p> <p>Additional units were directed to locate and secure water supply points and to</p>

L 2

Remarks:

Local Option

lay a line to E-6. E-6 began deploying 3 2 1/2" hand lines for a defensive operation on the B division of the structure. Next arriving units were S-1 and B-1, S-1 assisted in deploying hoselines and upon conferring with IC Battalion 1 assumed command of incident.

As E-1 and L-1 arrived they were directed to connect to a hydrant that had been located on the grounds of the inn and to begin operations with both an elevated stream and handlines from the driveway at the A/D divisions. E-2 was directed to locate another water source not on the property, nor close to the drive in hopes of it not affecting the supply being established for L-1. E-2 then connected to a hydrant at the intersection of Richmond Hill Rd and Skylyn Ct. They laid off their supply line and then E-7 completed that lay to E-6. Upon securing water supply crews from E-6, R-3, S-1 began utilizing handlines on the A/B Divisions. While attempting to flow on both sides of the structure neither could maintain an effective fire stream if both were flowing at the same time. At this point E-601 reported that there was additional buildings in the C-Division that were not involved at this point and could be defended if apparatus were repositioned. The aerial operation was suspended and the apparatus was relocated to the C-Division to a location that was better suited for their operation. They then caught an additional hydrant in the C-Division and E-1 then supplied them water from two hydrants. E-6's stream was shut down after the relocation of equipment and a water shuttle was established to supply it. C-4, was assigned that division and worked with both AFR and mutual aid resources to supply E-6.

Upon arrival C-2 was briefed as to the situation at this point and he assumed command of operations and Batt. 1 was assigned to Operations Division. R-3, S-1, E-8, & E-6 began salvage operations to remove any items that could be from ground floor of structure on the B/C divisions. E-7 assisted E-1 with relocating equipment and establishing additional handlines. E-7 was then assigned to force entry into basement and see if there was any kind of salvage efforts worth undertaking, they reported that there was not.

Then assigned S-1, R-3, and E-8 to attempt to ladder structure with ground ladders and access wall at the point where the roof lines change on the C-Division. They then cut an access hole into the wall to allow for water to be applied from the C-Division side into the attic. This in addition to the elevated stream allowed for the fire to be called under control at 04:44:21.

L-1 reported that two of the chimneys on the D-Division appeared to be leaning and they were instructed to avoid both with their aerial stream, the one closest to the middle of the structure eventually fell back into the structure. Another chimney closest to the A/B Division did collapse without warning and did scatter debris all over the driveway.

Crews continued overhaul efforts and applying water to the smoldering parts of the structure until shift change between 0700 and 0800 hrs.

The following is a status update that was generated by A-Shift Batt 1 J. Presley:
"L-1 set-up their truck and we knocked down the other chimney. E-1 made sure there were no hot spots left on 1st or 2nd floor. Q-5 wet down the fire area. I released E-1 and L-1 around 14:30 hours and I kept Q-5 to wet down fire area until around 17:30 hours. FM 10 and FM 41 were on scene along with 3 SBI agents and 3 insurance agents and 3 private investigators for the insurance company."

Time/Date: 16:46 on 03/23/2009 by BARRY L HENDREN AF130 HENDRENB

Investigation Notes:

Over a period of several days the AB-ATF, assisted by the NCSBI conducted a fire scene exam. This fire has been determined to be an intentionally set fire at or near the front entrance of the structure. (see AB-ATF report)

M.K. Thompson
